学术报告

**报告题目: Microplastics in the environment:
From pollution to solutions**

**报告专家: Gabriela Kalčíkova 副教授
斯洛文尼亚卢布尔雅那大学**

报告人简介:

Gabriela Kalčíkova completed her master's degree at Brno University of Technology in the Czech Republic and pursued her PhD at the University of Ljubljana with a focus on waste management. After her PhD, she pioneered a new field of research on microplastics at the Faculty of Chemistry and Chemical Technology at the University of Ljubljana in Slovenia. At the faculty, she is an associate professor and leads a dedicated research team on microplastics. Dr. Kalčíkova is recognized as one of the leading European researchers in the field of microplastics and specialises in their production, characterization, environmental aging, and behaviour. Her work also includes the ecotoxicological effects of microplastics and strategies to reduce the environmental pollution by plastic waste.
